

# ELIMINATE HAZARDOUS SKIMMING AND WASTE

USE

# ROWELL

## BOTTOM POUR LADLES

*never require skimming, always pour clean metal*

Only Rowell ladles pour clean. That's because Rowell ladles pour from the bottom of the bowl! What's more, this bottom pour feature of Rowell ladles eliminates hazardous skimming, an important safety feature. There is no waste of metal when discarding the dross.

### CONSTRUCTION FEATURES OF

## ROWELL SELF-SKIMMING LADLES

**BOWL**-durable cast iron with base to prevent tipping when placed on floor

**SLIDING SLEEVE**-on sizes 4 and up, made of gray iron, remains cool, protects user from burns

**BOWL OPENINGS**-each side of the pour spout has an opening that permits the last of the metal to pour out and let heat gases escape

**HANDLE**-steel bar with formed "D" grip, secured against turning by steel lock nut

Safety engineers classify molten metal skimming as a dangerous hazard - always protect your workers by using Rowell ladles.

### ROWELL LADLES ARE AVAILABLE IN TEN SIZES

Sizes 1 and 2 only have steel bar handle with wood hand grip

Interior view of ladle

3-inch ladle does not have sliding sleeve
